

DAVID BOTROS

Senior Frontend Engineer (React, TypeScript) – SaaS & Startups

+4367761751520 @botros-workspace@hotmail.com www.b-artfolio.com www.linkedin.com/in/david-botros-967ba4211
Vienna, Austria https://github.com/botros-workspace

SUMMARY

Senior Frontend Engineer with 8+ years of experience building high-performance SaaS and startup products using React, TypeScript, and modern frontend architectures. Proven track record in scaling applications, improving performance, and owning frontend systems end-to-end — from architecture and implementation to production and continuous iteration. Comfortable working in fast-moving environments, collaborating directly with founders, and leading frontend decisions.

EXPERIENCE

Frontend Engineer

Frontend Engineer (Freelance / Contract)

Worldwide

- Designed and built scalable React + TypeScript architectures for multiple clients, delivering production-ready SaaS and internal tools.
- Improved frontend performance and load times by 30–40% through optimized rendering, state management, and component design.
- Created reusable component systems and design patterns that significantly reduced development time and long-term maintenance effort across projects.
- Collaborated directly with founders, designers, and backend engineers to define requirements, ship features, and iterate quickly in fast-moving startup environments.
- Owned frontend delivery end-to-end, including architecture decisions, implementation, testing, and deployment.
- Frequently brought in to define frontend architecture and set technical direction for early-stage products.

Frontend Team Lead

MetainfoXR

Vienna, Austria

- Led the frontend development of a mobile application and data entry system from concept to production.
- Defined frontend and backend architecture to improve scalability, maintainability, and long-term product growth.
- Mentored and onboarded developers, conducted code reviews, and led internal React workshops.
- Worked closely with stakeholders to align technical decisions with business goals.

PROJECTS

Crewser – Lead Frontend Developer

- Designed and developed the frontend architecture for a time-tracking SaaS using React and TypeScript.
- Delivered a scalable, production-ready SaaS with a strong focus on usability, performance, and long-term maintainability.

Reference: crewser.app

Team Lead - MetainfoXR

Developed a React Native and TypeScript mobile augmented reality app featuring an interactive map displaying local events.
